NAVER Corporation is Korea's premier Internet company and a global leader in online services such as NAVER search (30M daily mobile users), LINE messaging (164M monthly active users) and WEBTOON (62M monthly active users). NAVER is continuously focussed on the future and in seamlessly connecting the physical and digital worlds through advanced technology. Its AI and Robotics research in Asia and Europe are fundamental to creating this future. NAVER invests over 25 percent of annual revenue in R&D yet innovation is but one core value. NAVER promotes diversity on the internet, respects and connects people helping them to share knowledge, create communities and preserve culture.
